

COVID-19 Weekly Snapshot

This report was updated on November 24, 2020 and includes data through November 21, 2020

A COVID-19 data snapshot specific to the City of Greenfield will be provided to our community members on a weekly basis. The purpose of each snapshot is to provide a summary of important updates and COVID-19 data. The data in each weekly snapshot is run on Sundays and be available to the public no later than Tuesday.

Data for this snapshot is collected from the following sources:

Greenfield: Local Health Department, COVID-19 is reported through the Wisconsin Electronic Surveillance System (WEDSS)

Milwaukee County: Wisconsin Department of Health Services (<https://www.dhs.wisconsin.gov/covid-19/county.htm>)

Wisconsin: Wisconsin Department of Health Services (<https://www.dhs.wisconsin.gov/covid-19/data.htm>)

United States: NACCHO Dashboard (<https://covid19-naccho.hub.arcgis.com/>)

Global: Johns Hopkins Dashboard (<https://coronavirus.jhu.edu/map.html>)

City, County, State, National and Global Data

Location	Total Confirmed Cases	Total Deaths
Greenfield	2,632	47
Milwaukee County	62,571	700
Wisconsin	357,771	3,011
United States	12,422,610	257,425
Global	59,373,667	1,399,983

***Please note:** Data within this report and its associated graphs are representative of data collected through the disease investigation process (*contact tracing*). When COVID-19 cases overwhelm the resources and capacity of our department, we are unable to complete disease investigations with each confirmed case which limits our data quality and may result in underestimation (*percentage of cases with underlying health conditions or reported symptoms*) or overestimation (*percentage of asymptomatic cases*) of the current burden. We are prioritizing cases among the most high-risk groups, and attempting to reach all other confirmed cases through notification by phone calls and letters.

Case Outcomes

This graph is based on case outcome: The majority of all confirmed cases **did not require hospitalization** due to COVID-19.

Of the 2,632 confirmed cases in the City of Greenfield, 2% of cases resulted in death, 6% of cases required hospitalization, and 92% of the cases required self-isolation. This data is consistent across other weeks.

Confirmed Cases in Greenfield Over Time

Symptom Onset

This graph is based on symptom onset: The highest number of cases when symptom onset began were reported during November 1-November 7. A total of 384 cases were identified during this time.

Note: The dates in this graph reflect the start date for the given week. So, a start date for 2/23 would include dates of 2/23-2/26.

When we consider symptom onset, the highest number of confirmed cases since February 23, 2020 were identified during the week of November 1- November 7 (384 cases). In general, weekly symptom onset totals are more reflective of disease transmission because it can take 2-14 days for COVID-19 symptoms to appear, making the graph more variable.

Confirmed Cases

This graph is based on the number of confirmed cases received per week: The highest number of confirmed cases were received during November 8-November 14. A total number of 418 cases were received during this time.

Note: The dates in this graph reflect the start date for the given week. So, a start date for 2/23 would include dates of 2/23-2/26.

When we consider the number of confirmed cases, the number of received cases first peaked during the week of July 12-18 (91 cases) and declined after that. However, from the week of August 23 and then on, it appears case counts were steadily increasing until this report week of November 15-November 21 (238 cases) when compared to the previous weeks (August 23-November 8). The week of November 8-November 14 reflects the highest number of total confirmed cases (418 cases) since February 23. Overall, this graph of weekly confirmed cases reflects the current burden of confirmed cases and the demand of contact tracing efforts.

Cases & Underlying Health Conditions

Cases: Of the 13,919 total COVID-19 case investigations, **2,632 residents were laboratory confirmed** as of Saturday, November 21, 2020.

Underlying Health Conditions: A total of **26%** of the confirmed cases had **underlying health conditions**.

Confirmed cases are those who have been positively identified through clinical testing to have been infected by COVID-19. The growing number of cases reflects the rapid spread of COVID-19. This is most likely due to an increase in testing availability, recommendation to test all symptomatic individuals, and increased interaction in public places and gatherings. The 2,632 confirmed tests to-date in the City of Greenfield represent 4.21% of the total positive cases in Milwaukee County.

Please note that, in cases where workplace outbreaks are occurring (including businesses and nursing homes), initial test results for staff members may incorrectly list Greenfield as the address since the address may default to the business address. Similarly, this happens in other communities throughout Milwaukee County. Ultimately, cases are reassigned to their home address but this process does take several days to a week to correct.

Testing

Testing capacity has increased since March 1. Currently, [Wisconsin Department of Health Services recommends testing](#) for anyone with symptoms of COVID-19 or who has been exposed to COVID-19.

**Note: This data is provided from a county-wide report released from the Medical College of Wisconsin and may not reflect real-time.*

ALL tests (March 1 - November 17) in Greenfield

Total: 26,885

Percent of all tests in Milwaukee County: 3.93%

Percent positive: 10.7%

Tests in the last two weeks (November 4- November 17) in Greenfield

Total: 3,544

Percent of all tests in Milwaukee County : 4.39%

Percent positive: 19.0%

Cumulative Outcomes

Cumulative Cases: The majority of **Confirmed Cases** due to COVID-19 in the City of Greenfield from March 1, 2020- November 21, 2020 did not require hospitalization or result in death.

Note: The city of Greenfield has experienced 147 hospitalized cases and 47 deaths related to COVID-19 - this is not reflected in the graph because the admitted hospital date or date of death is unable to be verified at this time.

The number of hospitalizations and deaths has slightly increased during this report week (11/15-11/21), but stayed relatively consistent over the past weeks in comparison to the number of confirmed cases. It is important to note, although, that not all hospitalized patients resulted in death. Final disposition is based on the date that the disease investigation was created, meaning that the data reflected in this chart represents a lag in data reported and we may see an increase over the next several weeks.

Symptoms

This graph is based on experienced symptoms: The most reported symptoms include cough, headache, and fever.

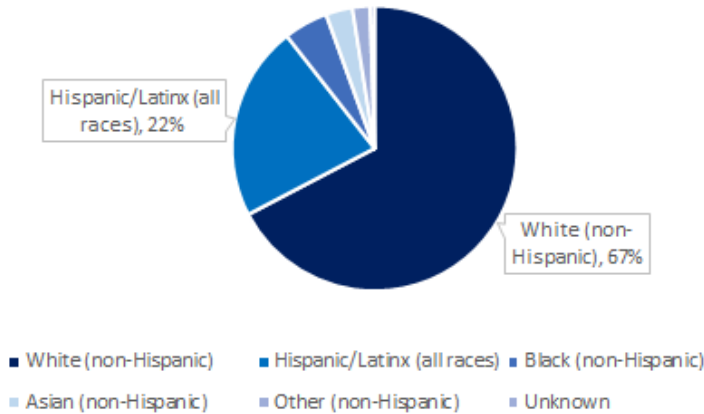

A wide-range of symptoms were reported among confirmed cases of COVID-19. The symptoms reported among confirmed cases in the City of Greenfield are consistent with symptoms identified by the CDC. These symptoms include cough, headache, and fever: 29% of confirmed cases reported a cough, 26% reported a headache, and 22% reported a fever. Furthermore, it is important to note that 42% of confirmed cases reported no symptoms during their isolation period.

Demographic Data

Race/Ethnicity

Demographic Data: More than half of the confirmed cases in the City of Greenfield identify their race/ethnicity as White (non-Hispanic)

According to the most recent Census Data, the majority of residents in the City of Greenfield identify as White (non-Hispanic), with Hispanic/Latinx being the second largest reported category. The COVID-19 demographic data for confirmed cases reveals that while Hispanic/Latinx individuals account for only 7.8% of Greenfield's population, they account for 22% of cases compared to Whites (non-Hispanic) who account for approximately 78% but make up 67% of cases. Out of the 2,632 cases, a total of 67% of cases identify as White (non-Hispanic), 22% identify as Hispanic/Latinx, 5% identify as Black (non-Hispanic), 3% identify as Asian (non-Hispanic), 2% identify as other (non-Hispanic), which includes Native Hawaiian or Other Pacific Islander, American Indian or Alaska Native, or other/not listed, and 1% of race/ethnicity case data is unknown.

Gender

Gender: The majority of confirmed cases in Greenfield, WI identify as female.

Of the 2,632 confirmed cases in the City of Greenfield, females make up 53% of the cases compared to males at 47%. This data continues to stay similar across weeks.

Age

Age: More than three quarters (80%) of the confirmed cases are younger than 65 years of age.

According to the CDC, older adults and people who have severe underlying medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing more serious complications from COVID-19 illness. Confirmed cases in Greenfield have been consistent with this statement, however, we are seeing an increase of cases among individuals < 65 years old. More than 3/4 of the confirmed cases are younger than 65 years of age: A total of 20% of confirmed cases are 65 years and older, 13% are between the ages of 55-64 years, 14% are between the ages of 45-54 years, 15% are between the ages of 35-44 years, 18% are between the ages of 25-34, 11% are between the ages of 18-24, and 9% are between the ages of 0-17 years.
