

# COVID-19 Weekly Snapshot

This report was updated on March 2, 2021 and includes data through February 27, 2021

A COVID-19 data snapshot specific to the City of Greenfield will be provided to our community members on a weekly basis. The purpose of each snapshot is to provide a summary of important updates and COVID-19 data. The data in each weekly snapshot is run on Sundays and be available to the public no later than Tuesday.

## Data for this snapshot is collected from the following sources:

**Greenfield:** Local Health Department, COVID-19 is reported through the Wisconsin Electronic Surveillance System (WEDSS)

**Milwaukee County:** Wisconsin Department of Health Services (<https://www.dhs.wisconsin.gov/covid-19/county.htm>)

**Wisconsin:** Wisconsin Department of Health Services (<https://www.dhs.wisconsin.gov/covid-19/data.htm>)

**United States:** NACCHO Dashboard (<https://covid19-naccho.hub.arcgis.com/>)

**Global:** Johns Hopkins Dashboard (<https://coronavirus.jhu.edu/map.html>)

## City, County, State, National and Global Data

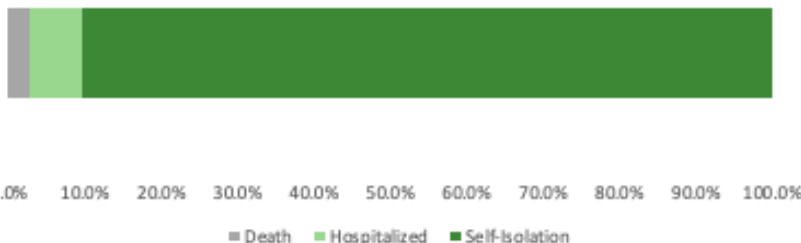

Location	Total Confirmed Cases	Total Deaths
Greenfield	4,115	109
Milwaukee County	98,259	1,237
Wisconsin	564,268	6,412
United States	28,649,109	511,233
Global	114,417,054	2,527,563

**Please note:** Data within this report and its associated graphs are representative of data collected through the disease investigation process (*contact tracing*). When COVID-19 cases overwhelm the resources and capacity of our department, we are unable to complete disease investigations with each confirmed case which limits our data quality and may result in underestimation (*percentage of cases with underlying health conditions or reported symptoms*) or overestimation (*percentage of asymptomatic cases*) of the current burden. We are prioritizing cases among the most high-risk groups, and attempting to reach all other confirmed cases through notification by phone calls and letters.

**Regarding deaths:** Coding a death as COVID-19 related requires an assessment of death certificates and requires the listing of COVID-19 as either a primary or underlying cause of death. Due to the delay in final disposition of deaths, the death data is often lagging by several weeks and an increase of deaths in this report week may reflect newly entered deaths from weeks prior.

## Case Outcomes

This graph is based on case outcome: The majority of all confirmed cases did not require hospitalization due to COVID-19.

Of the 4,115 confirmed cases in the City of Greenfield, 2.6% of cases resulted in death, 6.9% of cases required hospitalization, and 90.5% of the cases required self-isolation. This data is similar across previous weeks.

# Confirmed Cases in Greenfield Over Time

## Symptom Onset

This graph is based on symptom onset: The highest number of cases when symptom onset began were reported during November 1-November 7. A total of 393 cases were identified during this time.

When we consider symptom onset, the highest number of confirmed cases since February 23, 2020 were identified during the week of November 1- November 7 (393 cases). It seems symptom onset totals were steadily decreasing since that peak (11/1-11/7) until an increase occurred during the report week of December 27-January 2. This increase is likely associated with the holidays. In general, weekly symptom onset totals are more reflective of disease transmission because it can take 2-14 days for COVID-19 symptoms to appear, making the graph more variable.

**Note:** The dates in this graph reflect the start date for the given week. So, a start date for 2/23 would include dates of 2/23-2/26.

## Confirmed Cases

This graph is based on the number of confirmed cases received per week: The highest number of confirmed cases were received during November 8-November 14. A total number of 426 cases were received during this time.

When we consider the number of confirmed cases, the highest number of received cases, since February 23, occurred during the week of November 8- November 14 (426 cases). The graph suggests a peak in confirmed cases during the weeks of July 12 and November 8. Since then, it appears cases were steadily declining until a small increase during the weeks of 12/27-1/3 which is likely to be associated with the holidays. The continued decrease in cases, however, may be influenced by decreased testing. Overall, this graph of weekly confirmed cases reflects the current burden of confirmed cases and the demand of contact tracing efforts.

**Note:** The dates in this graph reflect the start date for the given week. So, a start date for 2/23 would include dates of 2/23-2/26.

# Cases & Underlying Health Conditions

**Cases:** Of the 19,078 total COVID-19 case investigations, **4,115 residents were laboratory confirmed** as of Saturday, February 27, 2021.

**Underlying Health Conditions:** A total of **28%** of the confirmed cases had **underlying health conditions**.

Confirmed cases are those who have been positively identified through clinical testing to have been infected by COVID-19. The 4,115 confirmed tests to-date in the City of Greenfield represent 4.19% of the total positive cases in Milwaukee County.

Please note that, in cases where workplace outbreaks are occurring (including businesses and nursing homes), initial test results for staff members may incorrectly list Greenfield as the address since the address may default to the business address. Similarly, this happens in other communities throughout Milwaukee County. Ultimately, cases are reassigned to their home address but this process does take several days to a week to correct.

---

## Testing

Testing capacity has increased since March 1. Currently, [Wisconsin Department of Health Services recommends testing](#) for anyone with symptoms of COVID-19 or who has been exposed to COVID-19.

*\*Note: This data is provided from a county-wide report released from the Medical College of Wisconsin and may not reflect real-time.*

### ALL tests (March 1, 2020 - February 23, 2021) in Greenfield

Total: 45,469

Percent of all tests in Milwaukee County: 4.07%

Percent positive: 10.2%

### Tests in the last two weeks (February 10, 2021 - February 23, 2021) in Greenfield

Total: 1,671

Percent of all tests in Milwaukee County: 4.68%

Percent positive: 3.3%

# Cumulative Outcomes

**Cumulative Cases:** The majority of **Confirmed Cases** due to COVID-19 in the City of Greenfield from March 1, 2020- February 27, 2021 did not require hospitalization or result in death.

**Note:** The city of Greenfield has experienced 284 hospitalized cases related to COVID-19 - this is not reflected in the graph because the admitted hospital date is unknown.

While the number of COVID-19 related hospitalizations and deaths has again increased during this report week (2/21-2/27), the percent of cases, who resulted in death or hospitalization, when compared to the total number of cases, has stayed relatively consistent over the past weeks (see page 2). Final disposition is based on the date that the disease investigation was created, meaning that the data reflected in this chart represents a lag in data reported and we may see an increase over the next several weeks.

## Symptoms

This graph is based on experienced symptoms: The **most reported** symptoms include **cough, headache, and fever.**

A wide-range of symptoms were reported among confirmed cases of COVID-19. The symptoms reported among confirmed cases in the City of Greenfield are consistent with symptoms identified by the CDC. These symptoms include cough, headache, and fever: 34% of confirmed cases reported a cough, 29% reported a headache, and 23% reported a fever. Furthermore, it is important to note that 35% of confirmed cases reported no symptoms during their isolation period.

# Demographic Data

## Race/Ethnicity

**Demographic Data:** More than half of the confirmed cases in the City of Greenfield identify their race/ethnicity as **White (non-Hispanic)**

According to the most recent Census Data, the majority of residents in the City of Greenfield identify as White (non-Hispanic), with Hispanic/Latinx being the second-largest reported category. Out of the 4,115 cases, a total of 68.0% of cases identify as White (non-Hispanic), 21.0% identify as Hispanic/Latinx (all races), 5.2% identify as Black/African American (non-Hispanic), 3.7% identify as Asian (non-Hispanic), 0.8% identify as "Other" (non-Hispanic), meaning that the case's self-identified racial/ethnic identity is not listed in the reporting form or identify as multiple races/ethnicities, 0.7% identify as American Indian or Alaska Native (non-Hispanic), 0.3% identify as Native Hawaiian or Other Pacific Islander (non-Hispanic), and 0.3% of race/ethnicity case data is unknown.

## Gender

**Gender:** More than half (53%) of confirmed cases in Greenfield, WI identify as **female**.

In the City of Greenfield, females make up 53% of the cases compared to males at 47%. These percentages continue to stay similar when compared to previous weeks.

## Age

**Age:** More than three quarters (81.6%) of the confirmed cases are **younger than 65 years of age**.

According to the CDC, older adults and people who have underlying medical conditions seem to be at an increased risk for developing more serious complications from COVID-19 illness. Confirmed cases in Greenfield have been consistent with this statement, however, we are seeing an increase of cases among individuals < 65 years old. More than 3/4 of the confirmed cases are younger than 65 years of age: A total of 18.4% of confirmed cases are 65 years and older, 14.2% are between the ages of 55-64 years, 13.6% are between the ages of 45-54 years, 14.7% are between the ages of 35-44 years, 19.0% are between the ages of 25-34, 10.7% are between the ages of 18-24, and 9.4% are between the ages of 0-17 years.
