A Detailed Summary of Greenfield's Housing Situation.....	24

## Section 1: Report Background and Introduction

---

Per Wis. Stat. §66.10013, the City of Greenfield has developed a Housing Affordability Report that responds directly to all statutorily required elements. The creation of this report is the effort of City staff, based on the template created for the 2019 City of Greenfield Housing Affordability Report by their consultant, Vandewalle & Associates. Data listed is from January 2017 through December 2022 and was compiled by City staff. All projects listed are those approved as of December 2022, not necessarily completed or constructed at that time. All residential development processes and fees derive from the [City of Greenfield Municipal Ordinance](#) Chapters 3 and 21.

## Section 2: Approved Dwelling Units by Development Process

---

Year	Subdivision Plats		Certified Survey Maps		Condominium Plats		Building Permits	
	Number	Units	Number	Units	Number	Units	Number	Units
2022	1	9	1	1	1	16	4	206
2021	0	0	0	0	1	2	8	10
2020	0	0	3	4	0	0	3	3
2019	0	0	0	0	0	0	7	34
2018	0	0	2	3	0	0	15	21
2017	0	0	4	5	0	0	33	395

Source: *City of Greenfield*

Below is a list of projects that are currently underway or anticipated to be underway in 2023. These projects are not included in the figures listed above.

- 183 units of multi-family housing at Loomis Crossing
- 273 units of multi-family housing at S. 92<sup>nd</sup> St. and W. Cold Spring Rd.

## Section 3: Location of Available Residential Opportunities

---

In the City of Greenfield, there are 170 vacant parcels that are currently zoned for residential development. Each one of these parcels is zoned one of the following: R-1, R-2, R-2A, R-3, R-3a, R-4S, R-4B, MFR-1, MFR-2, or MFR-3. See Map 1 for the location of these parcels and Appendix A for the full list of each parcel identified.

In the City of Greenfield, there are 59 vacant parcels that may be suitable for residential development, but are not currently zoned for residential development. Each one of these parcels is zoned one of the following: PUD, C-1, C-2, C-3, C-4, C-5, O, BP, M-1, or I. See Map 1 for the location of these parcels and Appendix A for the full list of each parcel identified. The zoning requirements for the following zoning districts can be found in Sections [21.04.0300](#) and [21.04.0600](#) of the City of Greenfield Zoning Ordinance.

Redevelopment opportunities that could accommodate housing units are defined as those parcels that are currently vacant but would require a rezoning for future residential development (above) or areas and corridors that were identified through the City of Greenfield Comprehensive Plan and City of Greenfield Opportunity Analysis. The individual parcels identified represent specific sites where known redevelopment is

likely to occur over the next 5 to 10 years. The more general corridors identified represent areas where redevelopment is likely to occur in the long-term, but it is premature to identify every individual redevelopment site at this time. Redevelopment corridors include: STH 100, West Layton Avenue, 76<sup>th</sup> Street, 27<sup>th</sup> Street, West Loomis Road, and Edgerton Avenue. See Map 1 for the location of these areas.

To note, because the City of Greenfield does not have any new “greenfield” development opportunities, all infill and redevelopment on parcels listed in Appendix A or displayed on Map 1 have adequate available services and public facilities. In nearly all cases, infrastructure is already present on-site or within the adjacent right-of-way.

## Section 4: Residential Development Regulations and Process Summary

---

Below are Greenfield’s common residential development types, the processes associated with each, and an approximate cost of the given process. Generally, the City’s single-family oriented Zoning Districts include the R-1, R-2, R-2A, R-3, and R-3A districts that range from a minimum lot size of 7,200 sf to 15,000 sf. Two-family development is oriented towards the R4-4, R-4A, and R-4B districts that also range from 7,200 sf - 15,000 sf. Multi-Family Zoning Districts include MFR-1, MFR-2, and MFR-3 with options for 3-6 unit and 7+ unit structures. High-density and mixed-use options almost entirely rely on a customized Planned Unit Development (PUD) process. Much of the new residential development in Greenfield will be developed through the PUD process because of the pattern of existing development within the City and the need for retrofitting and redevelopment in many instances.

Overall, the City’s development regulations, zoning districts, and modern design, engineering, utility, building, and subdivision requirements are very comparable to that of other communities in Milwaukee County and throughout the State. The provisions and standards are utilized to protect property values, promote high-quality structures with sustained longevity, and protect the health, safety, and welfare of the City’s residents, visitors, and businesses. Although permitted by Wis. Stat. 66.0617, the City of Greenfield does not choose to charge impact fees of any kind.

For further information and links to the City’s development processes, see Appendix B.

**Disclaimer:** The approximate cost of each process listed below is based on several basic assumptions and the calculation of the given processes. It does not represent the final cost of completing the process, it is intended to be used as a guide. Each situation is unique and will inevitably have variations in the costs associated with it.

Process of Constructing a Single-Family Detached Dwelling		
Scenario 1 – Permitted Use		Approximate Cost of The Total Process**
<b>1. Permitted Use: Site in the R-1, R-2, R-2A, R-3, R-3A, R-4, R-4B, MFR-1, MFR-2, MFR-3, or PUD Zoning District</b>		
(a) If the site is an approved subdivision or platted parcel	Process 1.(a)I.= minimum of \$2,700	
I. Then, building permits required		
(b) If the site is not an approved subdivision or platted parcel (one of the following applies):		
I. Certified Survey Map (CSM)*	Process 1.(b)I.= minimum of \$3,325	
1. Zoning Permit (for MFR-1, MFR-2, and MFR-3)		
a. Building Permits		
II. Subdivision plat* (one of the following applies):	Process 1.(b)II.1.= minimum of \$3,925	
1. Zoning Permit (for MFR-1, MFR-2, and MFR-3)		
a. Building Permits		
2. Special Use Permit* (See Section 21.04.0702A.)	Process 1.(b)II.2.= minimum of \$4,675	
a. Building Permits		
III. Planned Unit Development (PUD)*		
1. PUD Process See Section 21.08.0208	Process 1.(b)III.= minimum of \$4,575	
a. Zoning Permit		
▪ Building Permits		
<b>Scenario 2 – Zoning Map Amendment (Rezoning)</b>		
<b>2. Zoning Map Amendment Required: Site in the C-1, C-2, C-3, C-4, C-5, O, BP, M-1, I, or PR Zoning Districts</b>		
(a) Zoning Map Amendment* Process See Section 21.08.0112 (possible Comprehensive Plan Amendment Process See Wis. Stat. 66.1001(4))		
I. If the site is an approved subdivision or platted parcel	Process 2.(a)I.= minimum of \$3,350	
1. Then, building permits required		
II. If the site is not an approved subdivision or platted parcel (one of the following applies):		
1. Certified Survey Map (CSM)*	Process 2.(a)II.1.= minimum of \$3,975	
a. Zoning Permit (for MFR-1, MFR-2, and MFR-3)		
▪ Building Permits		
2. Subdivision plat* (one of the following applies):	Process 2.(a)II.2.a.= minimum of \$4,575	
a. Zoning Permit (for MFR-1, MFR-2, and MFR-3)		
▪ Building Permits		
b. Special Use Permit* (See Section 21.04.0702A.)	Process 2.(a)II.2.b.= minimum of \$5,325	
▪ Building Permits		

<b>3. Planned Unit Development (PUD)*</b> <b>a. PUD Process See Section 21.08.0208</b> <ul style="list-style-type: none"> <li>▪ <b>Zoning Permit</b></li> <li>• <b>Building Permits</b></li> </ul>	Process 2.(a)II.3.= minimum of \$5,225
---	---

*\*Requires a Public Hearing*

*\*\*The approximate cost of each process is based on several basic assumptions and the calculation of the given processes. In this example, it was assumed that there is a 1,200-sf single-family home being constructed. It does not represent the final cost of completing the process, it is intended to be used as a guide. In Scenario 1-Process 1.(a)I. the minimum was calculated using the following:*

- *\$100 = Certificate of Compliance*
- *\$60 = Min. Building Permit*
- *\$380 = 1,200 sf home at 0.32/sf Building Permit*
- *\$220 = Plan Examination*
- *\$1,806 = Park Land Dedication Fee*
- *\$108 = 1,200 sf home at 0.09/sf Electrical Permit*
- *\$60 = Min. Plumbing Fee*

**Disclaimer:** The approximate cost of each process listed below is based on several basic assumptions and the calculation of the given processes. It does not represent the final cost of completing the process, it is intended to be used as a guide. Each situation is unique and will inevitably have variations in the costs associated with it.

Process of Constructing a Two-Family Dwelling	
Scenario 1 – Permitted Use	Approximate Cost of The Total Process**
<p><b>1. Permitted Use: Site in the R-4, R-4A, R-4B, MFR-1, MFR-3, or PUD Zoning District</b></p> <p>(a) If the site is an approved subdivision or platted parcel</p> <p>    I. Then, building permits required</p> <p>(b) If the site is not an approved subdivision or platted parcel (one of the following applies):</p> <p>    I. Certified Survey Map (CSM)*</p> <p>        1. Zoning Permit (for MFR-1, MFR-2, and MFR-3)</p> <p>            a. Building Permit</p> <p>    II. Subdivision plat* (one of the following applies):</p> <p>        1. Zoning Permit (for MFR-1, MFR-2, and MFR-3)</p> <p>            a. Building Permit</p> <p>        2. Special Use Permit* (See Section 21.04.0702A.)</p> <p>            a. Building Permit</p> <p>    III. Planned Unit Development (PUD)*</p> <p>        1. PUD Process See Section 21.08.0208</p> <p>            a. Zoning Permit</p> <p>                ▪ Building Permit</p>	<p>Process 1.(a)I.= minimum of \$4,870</p> <p>Process 1.(b)I.= minimum of \$5,495</p> <p>Process 1.(b)II.1.= minimum of 6,095</p> <p>Process 1.(b)II.2.= minimum of \$6,845</p> <p>Process 1.(b)III.= minimum of \$6,745</p>
<b>Scenario 2 – Zoning Map Amendment (Rezoning)</b>	
<p><b>2. Zoning Map Amendment Required: Site in the R-1, R-2, R-2A, R-3, C-1, C-2, C-3, C-4, C-5, O, BP, M-1, I, or PR Zoning Districts</b></p> <p>(a) Zoning Map Amendment* Process See Section 21.08.0112 (possible Comprehensive Plan Amendment Process See Wis. Stat. 66.1001(4))</p> <p>    I. If the site is an approved subdivision or platted parcel</p> <p>        1. Then, building permits required</p> <p>    II. If the site is not an approved subdivision or platted parcel (one of the following applies):</p> <p>        1. Certified Survey Map (CSM)*</p> <p>            a. Zoning Permit (for MFR-1, MFR-2, and MFR-3)</p> <p>                ▪ Building Permit</p> <p>        2. Subdivision plat* (one of the following applies):</p> <p>            a. Zoning Permit (for MFR-1, MFR-2, and MFR-3)</p> <p>                ▪ Building Permit</p> <p>            b. Special Use Permit* (See Section 21.04.0702A.)</p> <p>                ▪ Building Permit</p>	<p>Process 2.(a)I.= minimum of \$5,500</p> <p>Process 2.(a)II.1.= minimum of \$6,125</p> <p>Process 2.(a)II.2.a.= minimum of \$6,725</p> <p>Process 2.(a)II.2.b.= minimum of \$7,475</p>

<b>3. Planned Unit Development (PUD)*</b> <b>a. PUD Process See Section 21.08.0208</b> <ul style="list-style-type: none"> <li>▪ <b>Zoning Permit</b></li> <li>• <b>Building Permit</b></li> </ul>	Process 2.(a)II.3.= minimum of \$7,375
--	---

*\*Requires a Public Hearing*

*\*\*The approximate cost of each process is based on several basic assumptions and the calculation of the given processes. In this example, it was assumed that there is a 1,200-sf two-family home being constructed. It does not represent the final cost of completing the process, it is intended to be used as a guide. In Scenario 1-Process 1.(a)I. the minimum was calculated using the following:*

- \$100 = Certificate of Compliance
- \$60 = Min. Building Permit
- \$640 = 2,000 sf home at 0.32/sf Building Permit
- \$220 = Plan Examination
- \$3,612 = Park Land Dedication Fee
- \$180 = 2,000 sf home at 0.09/sf Electrical Permit
- \$60 = Min. Plumbing Fee

**Disclaimer:** The approximate cost of each process listed below is based on several basic assumptions and the calculation of the given processes. It does not represent the final cost of completing the process, it is intended to be used as a guide. Each situation is unique and will inevitably have variations in the costs associated with it.

<b>Process of Constructing a Multi-Family Dwelling (3-6 Units)</b>	
<b>Scenario 1 – Permitted Use</b>	<b>Approximate Cost of The Total Process**</b>
<p><b>1. Permitted Use: Site in the MFR-1, MFR-2, MFR-3, or PUD Zoning District</b></p> <p>(a) If the site is an approved subdivision or platted parcel</p> <p>    I. Zoning Permit and Site Plan (See Section 21.08.0102B. and Section 21.07.0100)</p> <p>        1. <p>Process 3.(a)II.2.b.= minimum of \$10,575</p>	<p>Process 3.(a)II.3.= minimum of \$10,535</p>

\*Requires a Public Hearing

\*\*The approximate cost of each process is based on several basic assumptions and the calculation of the given processes. In this example, it was assumed that there is a 2,400-sf 3-unit building being constructed. It does not represent the final cost of completing the process, it is intended to be used as a guide. In Scenario 1-Process 1.(a)I. the minimum was calculated using the following:

- \$130 = \$100 + \$30 Certificate of Compliance
- \$75 = Zoning Permit
- \$600 = Site Plan
- \$60 = Min. Building Permit
- \$840 = 2,400 sf building at 0.35/sf Building Permit
- \$345 = Plan Examination (270+75)
- \$480 = Electrical Permit (160\*3)
- \$60 = Min. Plumbing Permit

- $\$35 = \text{City Forester Inspection}$
- $\$5,400 = \text{Park Land Dedication Fee } (1806*3)$

**Disclaimer:** The approximate cost of each process listed below is based on several basic assumptions and the calculation of the given processes. It does not represent the final cost of completing the process, it is intended to be used as a guide. Each situation is unique and will inevitably have variations in the costs associated with it.

Process of Constructing a Multi-Family Dwelling (7+ Units)

---	--

\*Requires a Public Hearing

\*\*The approximate cost of each process is based on several basic assumptions and the calculation of the given processes. In this example, it was assumed that there is a 5,600-sf 7-unit building being constructed. It does not represent the final cost of completing the process, it is intended to be used as a guide. In Scenario 1-Process 1.(a)I. the minimum was calculated using the following:

- \$170 = \$100 +\$70 Certificate of Compliance
- \$75 = Zoning Permit
- \$600 = Site Plan
- \$60 = Min. Building Permit
- \$1,960 = 5,600 sf building at 0.35/sf Building Permit
- \$450 = Plan Examination (270+175)
- \$1,120 = Electrical Permit (160\*7)
- \$12,640 = Park Land Dedication fee (1806\*7)
- \$60 = Min. Plumbing Permit
- \$35 = City Forester Inspection

**Disclaimer:** The approximate cost of each process listed below is based on several basic assumptions and the calculation of the given processes. It does not represent the final cost of completing the process, it is intended to be used as a guide. Each situation is unique and will inevitably have variations in the costs associated with it.

Process of Constructing a Mixed-Use with Residential	
Scenario 1 – Planned Unit Development	Approximate Cost of The Total Process**
<p><b>1. Permitted Use: Site in the PUD Zoning District</b></p> <p>(a) <b>Planned Unit Development Process*</b> (See Section 21.08.0208) (possible Comprehensive Plan Amendment Process See Wis. Stat. 66.1001(4)).</p> <p>I. If the site is an approved subdivision or platted parcel</p> <p>1. Zoning Permit and Site Plan (See Section 21.08.0102B. and Section 21.07.0100)</p> <p>a. Building Permit</p> <p>II. If the site is not an approved subdivision or platted parcel (one of the following applies):</p> <p>1. Certified Survey Map (CSM)*</p> <p>a. \*Requires a Public Hearing

\*\*The approximate cost of each process is based on several basic assumptions and the calculation of the given processes. Mixed-use developments are nearly all unique and vary greatly in size, scale, density, and mix of uses. In this example, there were too many unknown variables associated with a given mixed-use development to calculate a valid estimation of costs that would provide any tangible insight.

## Section 5: How Can the City Reduce Its Development Time and Costs By 20%?

---

The City of Greenfield is already completely built out and surrounded by incorporated municipalities on all sides. This means that it is not possible that any new “greenfield” residential subdivision options will be developed. Rather, the housing focus for the community is on increasing density to meet the needs of its future population. The City can utilize the following strategies to help reduce residential development time and costs, in addition to meeting the community’s existing and forecasted housing demand, while also meeting its long-term goals and preserving aesthetic quality, livability, and housing diversity.

### Reduce Development Time and Costs

1. **Allow smaller-lot single-family housing options by-right in residential zoning districts.** The existing ordinance provides options between a minimum lot size of 7,200 to 15,000 sf for single-family lots. Either by modifying the existing zoning districts or establishing a new district, the City could further reduce these requirements to a minimum lot size of between 4,000 to 5,000 sf. It also provides flexibility for developers and the potential for new starter or down-sizing options for residents.
2. **Reduce or waive parking requirements and/or allow shared parking for multi-family residential developments.** This can be done through a variety of ways including zoning changes, development agreements, or policy decisions. The reduction could reduce developers’ land and development costs in locations where alternative transportation options are available.
3. **Develop online applications to help reduce development time.** Right now, the City has several opportunities to apply for permits on their website. However, this could be expanded upon. Online applications that allow developers to apply and submit plans, documents, and fees for many of the Community Development Division’s procedures could also help reduce development time. Ultimately, these tools could also significantly reduce staff review time.
4. **Modify existing internal practices\*** such as:
  - a. Offer expedited review and special meetings for projects that meet specific requirements or provide substantial public benefit, which has been done in the past.
  - b. Allow more reviews and approvals to be handled at the staff level, rather than Plan Commission or City Council.
  - c. Adopt a substantial ordinance amendment that would change the Plan Commission’s role from an advisory committee to one that makes final decisions for site, landscaping, and architectural plan submittals.
5. **Utilize tax incremental financing (TIF) to help supplement some of the cost of new affordable housing in the community.** Utilize the special provision in tax increment financing law that allows the City to keep a tax increment financing district open for an extra year to support affordable housing and improve housing stock anywhere within the City. This approach has been utilized in Milwaukee, Madison, Appleton, La Crosse, and other Wisconsin communities.
6. **Encourage developers to leverage existing economic development tools and incentives available** such as Opportunity Zones, Low-Income Housing Tax Credits, Historic Preservation Tax Credits, and other state and County programs directly related to housing and redevelopment. Developers should be aware of funding sources that can have a sizeable impact on their bottom lines.

\*It should be noted that many City processes have statutorily required time frames, public hearings, and notices that cannot be modified by local government.

## Meet the City of Greenfield's Existing and Forecasted Housing Demand

1. **Change the definition of “Family” in the Zoning Ordinance.** Small changes to the definitions in the Ordinance could allow more people to live together, reducing the price of housing and thus reducing the per capita cost of housing. In order to adapt to new preferences and provide more flexibility, the City’s Zoning Ordinance definition of family can be modified to include new relationships such as domestic partnerships, guardianship, and foster children, along with additional options to specify the maximum number of unrelated adults, unrelated persons with disabilities, or unrelated adults with minor children. Another definition change that further modernizes the Ordinance is the addition of a new term, “functional family.” This new definition would allow four unrelated individuals who are essentially functioning as a family to be recognized as a family in the Zoning Ordinance.
2. **Establish density bonuses to incentivize developers to increase the density of development in strategic locations.** This policy would permit an increase in the allowable dwelling units per acre, floor area ratio, or height for pre-identified sites (increase between 10 to 20%) in exchange for the inclusion of affordable housing units in the development. This strategy can also help in providing affordable housing units to accommodate future community needs.
3. **Set goals for the future that clearly define the number of affordable housing units that need to be added to the community by a given year (i.e. 2030).** This can be done through the City’s Comprehensive Plan, a specific housing plan, or a broadly adopted policy by the City Council. Many communities throughout the state have started setting ambitious and clearly defined targets for needed affordable housing units, which has helped set the stage for construction of new units.
4. **Develop and establish a Greenfield Housing Committee.** This could be done through partnering with the City’s Community Development Authority, the Milwaukee County Housing Authority, and other government entities, in addition to local private sector partners. The development and establishment of a Housing Committee helps provide leadership on the topic and can drive initiatives on housing within the community. Opportunities exist for the committee to analyze and study the local housing needs (ex. Housing Needs Assessment), evaluate and prioritize key redevelopment sites to proactively foster redevelopment, and begin to develop new housing programs with private sector partners (ex. walking mortgage incentive).

## Section 6: How Do These Strategies and the City's Existing Housing Situation Relate to the City of Greenfield Comprehensive Plan and Other City Plans?

---

Per the 2020 Decennial Census, the City of Greenfield's population was estimated to be 37,803. There are a total of 17,909 households according to the American Community Survey and U.S. Census Bureau. According to the 2020 City of Greenfield Comprehensive Plan, the City is projected to have an additional 2,300 households and an additional 1,300-2,400 residents in 2030.

It's projected that the City of Greenfield's population will be between 38,300 and 39,400 in 2030. In comparison, the 2030 projected number of households in the City is approximately 19,000. The number of households is projected to increase more dramatically over the next 10 years because of the decline in projected average household size over that time period. This is very similar to many inner-ring suburbs of Milwaukee that may not see a significant increase in the number of new residents over the next decade but will need more overall housing units to accommodate the municipality's projected increase in total households. Further analysis of the existing housing situation in Greenfield is provided below and in Appendix C.

The following provides some insight into the City's current housing market and its affordability:

- The number of residential vacancies is extremely low, especially for owner-occupied units, which make up nearly 60% of all housing units in Greenfield.
- Nearly 40% of housing units are occupied by single-person households, and 55% of the housing stock is single-family units, so there are many single-family homes being occupied by just one person right now. If the average household size continues to decrease, the number of single-person households will most likely increase. This trend could result in an increased demand for multi-family units and a shift in the distribution of the City's total housing stock away from single-family detached homes.
- In 2019, the average price of a home for sale in Greenfield is more than 20% higher than the median home value just a few years ago. In part, this is due to the low vacancy rates and high demand.
- 30% of Greenfield's 2017 median income is approximately \$1,374 a month, and on a per capita basis its only \$821 a month. Utilizing these basic calculations, the median household income and per capita income in the City both fall below the monthly median owner-occupied cost for people with a mortgage (\$1,475). This means that the average household in Greenfield could not afford to live in the average owner-occupied house in 2017, let alone in 2019 at more than 20% greater.
  - In fact, any individual or family with an income below \$59,000 cannot afford the monthly median owner-occupied cost for homes with a mortgage, and any individual or family with an income below \$37,000 cannot afford the median monthly rent in the City. In Milwaukee County, nearly 40% of households could not afford to live in Greenfield.

*Sources: U.S. Census Bureau, American Community Survey 5-Year Estimates 2013-2017, U.S. HUD 2019 CHAS data calculated using ACS 2012-16, MIT Living Wage Calculator, 2018, and Zillow, 2019.*

To address these data points and many of the topics covered throughout this report, the following areas of the City's Comprehensive Plan directly address housing:

- Affordable housing is clearly stated as a goal of the community in the future.
- The Future Land Use Map was amended to reflect identified areas for future housing opportunities, more specially, mixed-use and higher-density residential locations.
- Recommended improvement to alternative modes of transportation to reduce overall parking needs and support higher-density housing opportunities.
- Continue to pursue redevelopment of underutilized properties and plan for vibrant mixed-use corridors and districts in their place.

Additionally, several other adopted plans also address housing and advance many of the goals, objectives, and strategies of the City's Comprehensive Plan.

The City has a variety of TIF Districts, each with its own plan per Wis. Stat. 66.1105. In fact, all of Greenfield's TIF District Plans include a common element as part of the proposed improvements and uses, new mixed-use with residential. Below are the City's active TIF District Plans:

- TID 2 - Greenfield Highlands TIF District Plan, 2007
- TID 4 - 60<sup>th</sup>-Layton TIF District Plan, 2015
- TID 6 - Chapman School-Cobalt TIF District Plan, 2015
- TID 7 – Greenfield Rehabilitation Hospital, 2020
- TID 8 – I-894 Interchange & Loomis, 2021

## Section 7: Conclusion

---

A wide range of factors associated with both the supply and demand of housing have led to the existing housing situation in the City, Region, State, and Country. A few of these issues linked to the supply of housing include risky lending practices in the early 2000s, the Great Recession and housing market collapse in 2008, the high costs of building materials and infrastructure, and a shortage of builders, developers, and skilled trades people. A few of these influences related to the demand for housing include increased college debt for younger generations and prolonged stagnation of wages preventing people from saving for a down payment, in addition to nation-wide changes in personal preferences (waiting longer to get married and start a family) and demographic shifts (people living longer in smaller households). Together, this has led to extremely low residential vacancy rates throughout the State and created a nation-wide affordable housing crisis.

Solutions to the existing housing affordability situation do not solely fall on the City to solve. In fact, the City's zoning, land use, and building regulations are modern, consistent, and work to encourage residential development at many different scales and price points. Greenfield also has a proven track record of strong working relationships with developers and has not turned down a new housing development in the many years. The true solution relies on a multi-faceted approach in which the City implements a variety of the strategies listed above, while innovative and progressive steps are also taken at the state and federal level.

## Appendix A: List of Residential Opportunities

For more information see the [Infrastructure and Design Manual](#) for the City of Greenfield.

## Appendix C: Data Analysis

---

### A Detailed Summary of Greenfield's Housing Situation

In 2017, there was a 6% vacancy rate of the total 17,737 housing units in the City. However, when breaking down the vacancy rate further, owner-occupied homes that rate only 0.7% and for rentals that was only 4.5%. Both rates are below a healthy residential vacancy rate (5%). Additionally, approximately 58% of the housing stock is owner-occupied, 38% is occupied by a single person household, and 55% are single-family units. For residents with an owner-occupied unit, the median home value was \$169,500 or approximately \$1,475 per month (with a mortgage), and for residents renting, the median gross rent is also high at \$925 a month.

For a more up-to-date look at some of housing situation, in January 2022 there were approximately 15 homes or residential lots listed for sale in Greenfield on Zillow with an average price of \$254,700. In comparison to the median owner-occupied home value in 2017, this figure is approximately 50% higher.

Greenfield's housing affordability is a combination of these data points, in addition to many other economic, social, political, and environmental factors. According to the Federal Department of Housing and Urban Development (HUD), housing affordability can be defined as spending less than 30% of a household's total income on housing costs. Essentially, any household that pays over 30% typically must make financial choices and tradeoffs in terms of other essentials, transportation, or having a chance at long-term financial stability. Any household above 30% is considered to be housing cost burdened. In Greenfield, 29% of household are housing cost burdened and 14% spend greater than 50% of their total income on housing (extremely cost burdened). This means that, nearly a third of all households in Greenfield are living financially unsustainably within the community because the cost of housing exceeds income by at least 30%.

Other key data to consider in evaluating the affordability of the community is median household income and living wage. Living wage is defined as the minimum hourly rate that an individual must earn to support their family, if they worked full time. The living wage in Milwaukee County for one working adult with one child is an hourly working wage of \$25.12. For two working adults with two children, the hourly living wage is \$16.27. That's approximately \$4,019 and \$5,206 (2 adults at \$16.27 per hour) per month. In comparison, the median household income in 2017 in Greenfield was \$54,973 and the per capita income was \$32,816, or, approximately \$4,581 and \$2,735 a month, respectively.
