

COVID-19 Weekly Snapshot

This report was updated on November 29, 2021 and includes data through November 27th, 2021

A COVID-19 data snapshot specific to the City of Greenfield will be provided to our community members on a weekly basis. The purpose of each snapshot is to provide a summary of important updates and COVID-19 data. The data in each weekly snapshot is run on Sundays and be available to the public no later than Tuesday.

Data for this snapshot is collected from the following sources:

Greenfield: Local Health Department, COVID-19 is reported through the Wisconsin Electronic Surveillance System (WEDSS)

Milwaukee County: Wisconsin Department of Health Services (<https://www.dhs.wisconsin.gov/covid-19/county.htm>)

Wisconsin: Wisconsin Department of Health Services (<https://www.dhs.wisconsin.gov/covid-19/data.htm>)

United States: NACCHO Dashboard (<https://covid19-naccho.hub.arcgis.com/>)

Global: Johns Hopkins Dashboard (<https://coronavirus.jhu.edu/map.html>)

City, County, State, National and Global Data

Location	Total Confirmed Cases	Total Deaths	Percent of Adults (18+) Fully Vaccinated
Greenfield	5,720	111	73.0%
Milwaukee County	145,367	1,626	66.5%
Wisconsin	864,190	8,964	66.9%
United States	48,207,861	775,287	82.2%
Global	264,707,621	5,203,155	44.5%

Please note: Data within this report and its associated graphs are representative of data collected through the disease investigation process (*contact tracing*). When COVID-19 cases overwhelm the resources and capacity of our department, we are unable to complete disease investigations with each confirmed case, which limits our data quality and may result in underestimation (*percentage of cases with underlying health conditions or reported symptoms*) or overestimation (*percentage of asymptomatic cases*) of the current burden. We are prioritizing cases among the most high-risk groups, and attempting to reach all other confirmed cases through notification by phone calls and letters.

Regarding deaths: Coding a death as COVID-19 related requires an assessment of death certificates and requires the listing of COVID-19 as either a primary or underlying cause of death. Due to the delay in final dispositions of deaths, the death data is often lagging by several weeks and an increase of deaths in this report week may reflect newly entered deaths from weeks prior.

Case Outcomes

This graph is based on case outcome: The **majority** of all confirmed cases **did not require hospitalization** due to COVID-19.

Of the 5,720 confirmed cases in the City of Greenfield in 2021, 1% of cases resulted in death, 5% of cases required hospitalization, and 94% of the cases required self-isolation. This data is consistent with previous weeks.

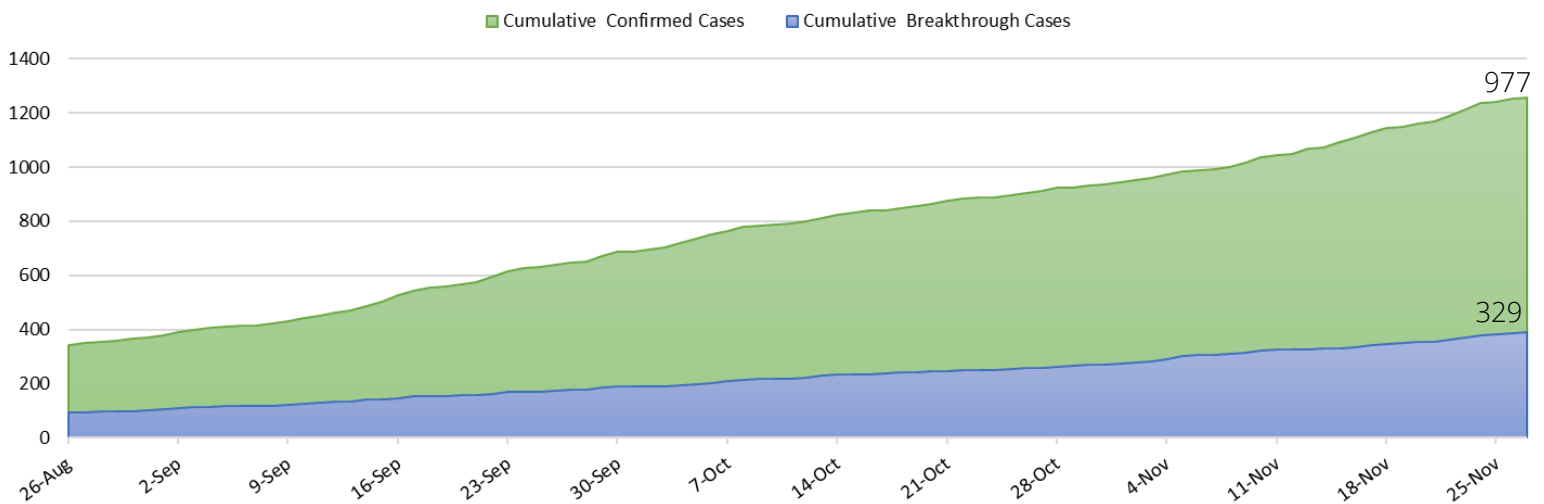

Confirmed Cases in Greenfield Over Time

Confirmed Cases

Note: This graph reflects reported cases in Greenfield each day since August 25th, 2021. Over the past week, 11/21-11/27/2021, there were 98 total cases, with the greatest amount of 26 cases on November . This graph also shows the amount of cases by age group, those 18 and under in red, and those 19 and over in yellow. Cases among those 18 and under have been increasing over the past 2 months. The numbers displayed above the bars in the graph indicate the total reported cases for that day.

CUMULATIVE CASES & POST-VACCINATION CASES SINCE AUGUST 26TH, 2021

Cases in Greenfield have been increasing over the past 3 months, primarily among those who are unvaccinated (63.2%). However, some cases are among those who are fully vaccinated (36.7%). A case among someone who is fully vaccinated is termed a **'post-vaccinated'** case. The Delta variant, a more transmissible version of COVID-19, is the most common strain of COVID-19 we are currently seeing across the nation. Fully vaccinated people can still test positive for COVID-19, however being fully vaccinated drastically reduces the risk of hospitalization and/or death and helps to reduce the spread of disease. As recommended by the CDC, people should **wear their masks in public places and continue to social distance regardless of their vaccine status.** More information regarding vaccines and where to find them is listed on the last page of this report.

Testing

ALL tests (March 1st, 2020 - November 26th, 2021) in Greenfield

Total: 81,485

Percent of all tests in Milwaukee County: 4.0%

Percent positive: 8.0%

Tests in the last two weeks (November 10th - November 26th, 2021) in Greenfield

Total: 2,670

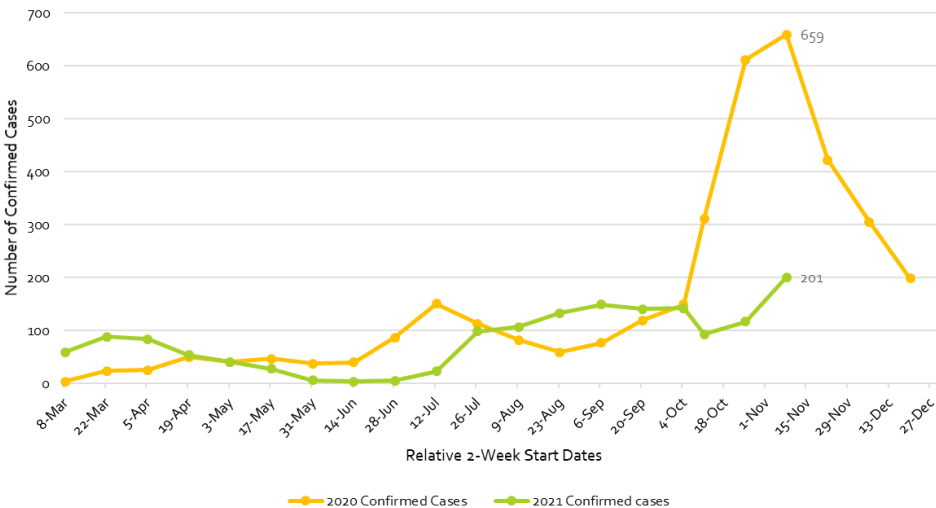

Percent of all tests in Milwaukee County: 4.6%

Percent positive: 9.6%

**Note: This data is provided from a county-wide report released from the Medical College of Wisconsin and may not reflect real-time.*

Confirmed Case by Year Comparison

Comparison of Total cases by Year

This graph shows a comparison of this year's confirmed cases (2021, reflected in green), to last year's confirmed cases (2020, reflected in yellow), with relative 2-week start dates. Greenfield has lower cases around this time this year than last year. We anticipate cases to rise during the winter holiday months.

In the recent two weeks, 11/14-11/27/2021 there have been 201 cases. Whereas, last year around the same time, 11/8-11/21, there were 659 cases. That is a 69.5% decrease of confirmed cases from 2020's 2-week case total, around the same time.

Demographic Data

Race/Ethnicity

Demographic Data: More than half of the confirmed cases in the City of Greenfield identify their race/ethnicity as **White (non-Hispanic)**

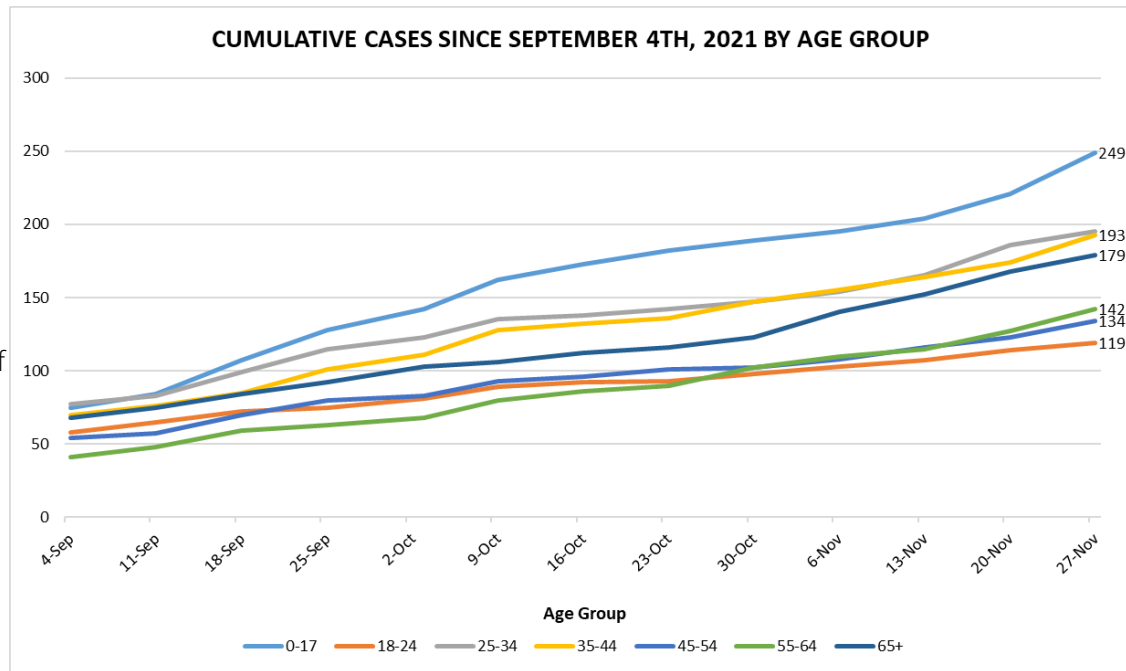

According to the most recent Census Data, the majority of residents in the City of Greenfield identify as White (non-Hispanic), with Hispanic/Latinx being the second-largest reported category. Out of the 5,720 cases, a total of 67.93% of cases identify as White (non-Hispanic), 5.68% identify as Hispanic/Latinx (all races), 5.64% identify as Black/African American (non-Hispanic), 3.95% identify as Asian (non-Hispanic), 1.21% identify as "Other" (non-Hispanic), meaning that the case's self-identified racial/ethnic identity is not listed in the reporting form or identify as multiple races/ethnicities, 0.61% identify as American Indian or Alaska Native (non-Hispanic), 0.42% identify as Native Hawaiian or Other Pacific Islander (non-Hispanic), and 0.25% of race/ethnicity case data is unknown.

Age

Over the past 3 months, we have seen an **increase in cases among those in the 0-17 age group**.

Currently, the largest amount of cases are occurring among the 0-17 year old age group, at 12.6% of cases. The second largest amount of reported cases are occurring in the, the 25-34 years old at 18.3% of cases. As the back-to-school season starts up over the next few weeks, these trends will continue to be closely monitored.

Immunizations

A total of 23,294 individuals in Greenfield have completed the COVID-19 Vaccine series since January 2021

Younger age groups are increasing in their numbers of completed vaccine series

Almost 3/4ths (73.0%) of all Greenfield's adults, ages 18+, are fully vaccinated. As more people become vaccinated, transmission of COVID-19 decreases. While a breakthrough case is rare, a person who is vaccinated becomes sick, it is still possible. **Vaccines have been shown to reduce the severity of illness and lower the risk of hospitalization and/or death.**

It is important that all eligible people get fully vaccinated to protect both themselves and others from illness, and reduce the spread of disease.

Vaccination efforts began in December of 2020, and different groups of people became eligible to receive the vaccines at different times. **Currently, all individuals 18+ are eligible to receive any of the vaccine types: J&J (Janssen), Moderna, or Pfizer.**

Vaccine rates appear to be leveling off over the past couple of months, however, there are many individuals who are still unvaccinated.

The Greenfield Health Department vaccinated over 8,400 people at clinics held in Greenfield and in collaboration with surrounding jurisdictions. **The Greenfield Health Department is currently scheduling appointments for clinics on most week days. We now offer Pfizer vaccinations to children 5-11 years of age.**

We continue to see some increases in completed vaccine series across age groups in Greenfield, specifically among those in the 12-17 range. During the back-to-school season, it is important to remind parents and guardians that the **Pfizer COVID-19 vaccine is approved for children 5 years of age and older.** We encourage all eligible, interested individuals to search vaccine availability on www.vaccines.gov.

Almost 3/4ths of Greenfield adults are fully vaccinated, and 89.2% of seniors 65+ are fully vaccinated
